New Vectra 3D™ from Summit VetPharm. The name says it all.

We called it Vectra because it protects against vectors of disease. The “3” represents three active ingredients: dinotefuran, permethrin and pyriproxifen. The “D” stands for dogs. Only Vectra 3D provides so many dimensions in protection for dogs, and your practice.

- **New** – a novel, triple action formulation that parasites have never encountered.
- **Complete** – kills fleas at all stages of development, four species of ticks, plus three species of mosquitoes, too.¹
- **Fast** – kills 96% of fleas within 6 hours, up to 100% in 12 hours.¹
- **Repels and Kills Fleas, Ticks and Mosquitoes** – three vectors that may transmit disease.¹
- **Lasting** – provides a full month of protection.¹
- **Safety** – gentle enough for puppies as young as 7 weeks.¹
- **Easy** – an applicator so unique and easy-to-use, it’s patented.
- **Traceable** – authenticity and veterinarian exclusivity is protected by Bloodhound™ Technology.

For more information or to order Vectra 3D, call **800-999-0297**, visit **summitvetpharm.com** or contact your Summit VetPharm or Abbott Animal Health representative.

Vectra 3D is also available through these distributors: Midwest Veterinary Supply, Inc., Merritt Veterinary Supplies, Inc., NLS Animal Health, a division of Henry Schein, Inc., Victor Medical Company and Sanum Puerto Rico.

Contact your sales representative regarding local state approval and product availability.
